FOR IMMEDIATE RELEASE

Remke Industries, COVID-19 Continuity Plan

To All Remke Customers,

At Remke, we have put in place the processes, infrastructure and CDC/WHO best practices that should help in protecting our associates from further spread of the COVID-19 virus. We know you depend on Remke to deliver the right part on-time every time, and we plan on making good on that promise.

We want our customers to know that we are taking every precaution to protect our associates. This includes...

- Immediately suspending all non-essential travel for all employees.
- Multiple in-building communications on protecting oneself and their co-workers from contracting or spreading the virus.
- Daily associate briefings on COVID-19 and what they can do to protect themselves and their co-workers.
- We have instituted a no-associate-left-behind policy whereby hourly associates who need to self-quarantine will do so with their full pay and benefits.

For our valued customers, we want you to know that at the initial stages of this crisis, we increased inventory levels on all items that are not domestically acquired. In short, we have you covered so there should be no interruption of the products you purchase from us.

As many customers feel the pain of supply chain issues from their vendors, Remke can proudly say that because of our USA First policy with regards to sourcing, we have no such issues as of the writing of this. We are running at full production, even adding a new molded machine and added a 2nd shift to satisfy the demand.

During this time, you can confidently expect the same quality products and high level of service from our team.

If you have any questions, do not hesitate to reach out to me personally or your TSM (via sales@remke.com). Stay safe and healthy.

Kind regards,

Mark Sweeney
President/COO
